### CAREER OBJECTIVE

Junior Frontend Developer specializing in React.js, JavaScript, Tailwind CSS, and MUI. Skilled in building responsive, production-ready user interfaces, reusable components, and clean front-end architecture. Experienced with Firebase (Auth, Firestore), REST API integration, data visualization, performance optimization, and modern UI/UX practices. Strong problem-solving, fast learning, and the ability to work independently or in a team. Seeking a junior or internship role to apply my skills and contribute to real-world applications.

### WORK EXPERIENCE

#### Frontend Developer Intern

Independent / Remote

Nov 2024 / Islamabad, Pakistan

- Developed reusable components and UI modules using React.js, React Hooks, and Context API.
- Built responsive, pixel-perfect interfaces using Tailwind CSS and MUI.
- Integrated REST APIs and implemented real-time data features using Firebase Firestore.
- Designed dashboards and interactive charts using Nivo and Chart.js.
- Implemented 5+ interactive forms with built-in validations and controlled inputs using Formik and Yup, improving user experience and reducing invalid submissions.
- Built complex UI features including Kanban board, calendar component, and dynamic data tables with filtering & pagination.
- Applied performance optimization techniques such as memoization, lazy loading, and code splitting.
- Created custom hooks for data fetching, debouncing, state persistence, and event listeners.
- Developed authentication flows using Firebase Auth and implemented protected routes.
- Implemented Cloudinary integration for media uploads, optimization, and secure delivery.
- Collaborated remotely using GitHub for version control and followed clean, modular coding practices.
- Improved UI/UX quality through debugging, refactoring, and accessibility enhancements.
